OUR SLOGAN: An Industrial Metropolis of Industrious People Who Pull Together.

Volume 18

THE REDCLIFF REVIEW, THURSDAY, JULY 10th, 1930

Number 18

Redcliff Stampede Was Great Success

Excellent Horse Races and Real Bucking.

With ideal weather for the Stampede and race meet held on Dominion Day, the event, so far as the program was concerned, was one of the most successful yet held.

Although in the neighborhood of 300 cars circled the enclosure the crowd was not quite so large as last year and the reduction in the price of admission made a considerable shrinkage in the total gate receipts.

However the general opinion was that the sports were well conducted and all felt they had received their money's worth.

The event was well organized and the several officials performed the tasks allotted to them in a most satisfactory manner. To them the president wishes to extend the hearty thanks of the association for their untiring efforts in assisting to make the day the great success it was.

In the horse races there was a good field of entries for every event and the close finishes furnished regular race horse excitement for the spectators. Deserving of special mention in these were the mile open the Roman Standing race and the boys' pony race. The first mentioned was a grand finish when young G. Ellis after trailing to the three quarter post, burst into the stretch and won his horse under the wire an eye lash ahead of Miss Hart's mount. Graham also made the same sensational finish in the boys' pony race. There were five entries in the Roman Standing race and throughout the distance they were well bunched, coming down the stretch in good old Roman Style.

The ladies relay race also got a good hand from the crowd when the plucky Annie Schillmar although thrown twice, gamely remounted and finished the race. The sportsmanship of her opponent, Miss Schaffer, who reined in her horse to give Miss Schillmar time to remount was the signal for great applause.

The bucking-horses supplied by J. Delinks of Bowell and the wild steers furnished by Geo. Dixon, were among the best seen at any Stampede in the west and both riders and spectators got a great kick out of performance.

The day's program started off with a long list of running races school children of all ages. These were well patronized by the youngsters. Besides the prizes awarded all the children entering got an ice cream cone.

The following were the winners in the

Saddle Horse Races.

Boys' Race—1, G. Ellis; 2, K. Ellis.

Six Furlongs—1, L. Stone (ridden by J. Reymann); 2, G. Ellis; 3, Peterson.

Half Mile—(in heats) 1, Hazel Hart; 2, Tucker; 3, K. Ellis.

One Mile (open)—1, G. Ellis; 2, Hazel Hart; 3, J. Reymann.

Ladies Race—1, Eda Schaffer; 2, Miss Miles.

Pony Race—1, G. Ellis; 2, J. Schaffer; 3, R. Deacon.

Roman Standing Race—1, F. Deace; 2, Bob Page; 3, J. Wells.

Ladies Relay—1, Eda Schaffer; 2, Annie Schillmar.

Men's Relay—1, Bob Page; 2, F. Deace; 3, Joe Tester.

Stake Race—1, Basil Lawrence

Former Redcliff Boy At Hyman's Altar

Kitchen—Towle

A pretty wedding was solemnized at the home of Mr. and Mrs. Ray Towle, Fourth street, Medicine Hat when their oldest daughter, Lillian, became the bride of Mr. Henry D. Kitchen, third son of Mr. and Mrs. John Kitchen of Redcliff. The ceremony was performed by Rev. M. S. Blackburn in the presence of twenty-five relatives and friends of the contracting parties.

The bride, who was given in marriage by her father, wore a becoming ensemble of rose silk voile with hat to match and carried an arm bouquet of roses. She was attended by Miss Violet Woods, frocked in mauve crepe and carrying a sheaf of roses. Mr. Edward Wainwright of Redcliff was groomsmen, and Miss Edith Reid played the wedding music.

The wedding breakfast was served at the home of the bride's parents. During the evening the bridesmaid and pianiste each received a compact from the groom, and the best man a silver cigarette case.

Mr. and Mrs. Kitchen will reside in Medicine Hat. (Medicine Hat News.)

Miss Learmonth, of Calgary is spending her holidays in town visiting her parents.

2. Fred Walker Jr.

Consolation—1, L. Williamson; 2, Annie Schillmar; 3, R. Deace; 4, Bucking and Steer Riding; 5, L. Thompson; 6, Dave Donaldson; 7, Max Donaldson.

Steer Riding—1, Joe Wells; 2, L. Thompson; 3, M. Donaldson.

Wild Cow Milking Contest—1, M. Donaldson; 2, Basil Lawrence

G. M. Blackstock is Conservative Candidate

Is also Endorsed by Farmers At the Convention.

At a well attended convention called by the Conservative party in this constituency and held in Medicine Hat last Saturday, Mr. G. M. Blackstock, K. C., was chosen as the candidate to represent the party in the Dominion general election which takes place on the 28th of this month.

The Conservative convention followed a U. F. A. Convention held earlier in the day at which the U. F. A. decided not to put a candidate in the field.

A large number of farmers who were in the city for the U. F. A. convention also attended the conservative convention and during the meeting several of them took part in the discussion. They claimed a large number of farmers in the constituency were dissatisfied with the record of the Liberal government and were much interested in whom the conservatives would select as their standard bearer, as it depended on him as to how the farmers would vote in this election.

After the selection of Mr. Blackstock as the candidate these same farmers were not backward in showing their approval and volunteering their support to him.

Bray Lake picnic and Dance will be held Saturday of this week.

While engaged at his work in the Brick and Coal mine last Saturday, Andy Stratton met with an accident. Mr. Stratton ran into a gas pocket at a dead end and in the explosion which followed he was badly burned about the face and hands. He was rushed to the hospital where his wounds were attended to and he is now progressing favorably.

Medicine Hat News Gives Wrong Impression

In its issue last Saturday the Medicine Hat News tries to make political capital against Hon. R. B. Bennett, by stating that Mr. Bennett used his members franks instead of postage stamps for sending postcards over the country announcing the radio hook-up for broadcasting his Winnipeg speech. The News intimates that because Mr. Bennett is a wealthy man he should have paid postage on these cards.

If the News had wanted to be fair it would have said nothing about the franking practice of members of parliament. The News knows perfectly well that "franking" letters has been the custom of members of all shades of politics, for years. The News knows also that the political propaganda letters which it has received from Dr. Gershaw and published in its columns from June to June while the house is in session, were sent to the News by Dr. Gershaw in "franked" envelopes. Now Dr. Gershaw is also a wealthy man. If it is wrong, as the News intimates, for Mr. Bennett to use the frank because he is a wealthy man, surely it is just as wrong for Dr. Gershaw, who is also a wealthy man, to do it. Surely that sounds reasonable.

The Review, however, thinks that neither of them did anything wrong as both were simply taking advantage of one of the privileges of a member of parliament.

During the past week there have been a few changes in real estate. H. G. Sheasby has purchased the residence on sixth st. previously owned by H. J. Simpson and J. Male has purchased Mr. Sheasby's residence on fifth St.

Examination Results In Public School

The following are the results of the Public School examinations held just before the holidays:

Grade I Pass List

Annie Schaeffer, Harold Congram, Joe Bastien, Stanley Lenning, Flora Stratton, Kate Evans, Anna Jorgensen, Evelyn Kaldestad, Lenore McClellan, Grace Garnett, Harold Neumann, Viola Walker, Evelyn Fulton, Gordon Osgood, Violet Hope, Winnie Bamforth, Billy Blades, Wilfred Fairhurst, Eugene Rose, Zaida McKay, Edward Martin, Reggie Gale, Oscar Johnson, and Muriel Brydie.

From Grade II to Grade III

John Walton, Shirley Sibley, Esther Rennie, May Martin, Jack Lin, Norma Osgood, John Balmer, John Walton, Doreen Cook, Annette Eastlen, Dossie Donald, Stanley Rose, Lizzie Arnold, Kenneth Newnham, Segrid Hodstad, Hedwig Klemm, Wilfred Reymann, Agnes Rindahl, David Gordon, Bruce Colard, Mary McClellan, Alice McLachlan, Alfred Brucker, Tony Starck, Wilfred Hurlbert, Joe Brucker. On trial for Julia Erickson, Charles Cairns. Passed without examination: Rosie Starck.

From Grade IV to V

Bobbie Allenback, Roy Allenback, Svend Anderson, George Ballantyne, John Balmer, Edna Bastien, Rodwell Bell, Rosalie Brucker, Alice Buchholz, Eileen Cooke, John Garrecht, Michael Jarrold, Ellen Hope, Jimmie Jackson, Sylvia Kaldestad, Annie Kelher, Frank Kelher, Jack Learmonth, Janet McFadden, Alex McLachlan, Zelma McKay, Gordon Newnham, David Paterson, Norman Rindahl, Alfred Schaeffer, Gordon Simpson, Annie Oswald Swann, Norma Walcott and Irene Ziegler.

Passed to VI Senior

Carlisle Buchholz, James Dutton, Lily Knudsen, Inez Rindahl, John Reymann.

Passed to VI

Mary Allenback, Eddie Bessler, Ernest Bohnet, Annie Bolton Jack Brydie, Helen Ferns, Robert Fulton, Gordon Garrett, Edward Harris, Florence Johnson Edward Keats, Elizabeth Klemm Eva Lien Douglas Lenning, Gene Mallard, Margaret Stratton Gladys Taylor, Niel Van Wort. Grade VII, Senior.

The following made a clear pass to Grade VIII. Names are in order of merit.

Willie Pearson, Elmer Congram, Florence Jacobson, Willie Cairne, Eric Congram, Sarah Davies, Blodwen Evans, Emma Podesta, Keith Ellis, Bertie Podesta, Edith Collins.

The following passed in all subjects with the exception of the one indicated. This subject will have to be taken over again with Grade VII until it is brought up to the Standard.

Mary Broughton (Arithmetic) Grace Maskell (Arithmetic), G. Kitchen (Arithmetic), Myrtle Skidmore (Arithmetic), Raymond Subean (Composition).

BENNETT SHIELD

GAME ON FRIDAY

In the local football league the first round for the Bennett Shield will be played here on Friday evening of this week when Redcliff Town and the Brick and Coal are drawn. This will be a knock-out series. The Calties and Legion will play next week and winners will meet later.

The Unemployment Question in Politics

Attitude of both Parties Before the People.

Now that the unemployment situation is becoming a live issue in this election campaign the Medicine Hat News attempts to criticize Mr. G. M. Blackstock, the Conservative candidate in this constituency for making reference to it in his address on accepting the nomination.

As a salve to heal the wound caused by the Liberal government failure to do anything to solve the unemployment situation, or to assume any responsibility for the same, the new refers to an order-in-council passed in 1921 by the Conservative government which was in power at that time. While it is quite true that the order-in-council referred to, states that unemployment is, "institutionally, primarily a municipal responsibility, yet that same order-in-council also states that when such a condition gets beyond control of the municipalities the federal government should then assist the municipality.

That was the Conservative policy in 1921 and that is the policy of the party in 1930 when the unemployment question has reached the stage when it is beyond the control of the municipalities. Contrast that with what has been the policy of the Liberal party for the past two or three years. During that time the unemployment question has been a serious one. Municipalities and provincial governments have been holding conferences with a view to solving the problem. The Liberal government at Ottawa has been appealed to on several occasions by municipal officials but on each occasion they have either turned deaf ear or passed the buck, until now on the eve of a general election, the best they can offer is another conference when the matter will be discussed. In the mean time unemployment is flourishing and the Liberal government at Ottawa sits calmly by and does absolutely nothing, waiting, as (Continued on Back Page)

Churches

Breaking New Trails in the Rockies

Every year the Order of the Trail Riders of the Canadian Rockies gathers together its devotees who set out into the unknown, on the almost unknown, on mountain ponies from the starting point at the Banff Springs Hotel or Chateau Lake Louise. For those new to the game there is a trail ride of a few days, covering, however, little travelled paths, while for the expert there is a ride of three weeks penetrating to the heart of the Rockies, and both end in a grand blow-out or campfire meeting where songs are sung and the feeling of general politics is perpetuated. These Trail rides are held in August when the weather is at its best and lovers of the outdoors gain an experience which, even if they never repeat it, will furnish them with memories and stories for a lifetime. Every year new trails are broken, the one last year being over Gibson Pass, named after the founder of the Order. The ride attracts travellers from every part of the continent and from Europe, and some 1,500 of them are now enrolled in the Order. Lay-out shows riders passing through Gibson Pass, taking a rest at Shadow Lake with Mount Banff in the background, and folding an arm of the Lake of Hanging Glaciers.

Spectre Has Disappeared

New Yorker Measure - Removes Feudalism Around U.S. Petrol.

The grotesque spectre of ten thousand heavily armed men marching up and down the Canadian border to enforce the immigration and customs laws of the United States, never more than a spectre, has been fading rapidly for several months, and when the interstate commerce committee of the House reported a border bill, the ghost disappeared.

The bill as reported, provides for no military force, as was at first proposed, but merely for upfitting of the customs and immigration patrols under the treasury. It makes it illegal for anyone to enter the country except at a designated point of entry, but the exception has been enlarged and the regulation made easier by inserting a clause under which people living on the border or in the "neighborhood or vicinity" will be allowed to pass freely.

The border patrol, under the bill, will consist of about 700 immigration agents and 500 customs men, combined in the civil service force. Prohibition duty agents are not included in the force. Provision is made for enlargement of the patrol, if necessary, but no specific increases are mentioned.

The sole regulation upon which some apprehensions might be based with some apprehensions, is the provision for entry except at designated points, and Ogden L. Mills, undersecretary of the treasury, in authority for the statement that a sufficient number of points will be named to take care of commerce across the border.

At present a person may cross anywhere and make a report to the nearest customs and immigration station.

Makes Life Worth Living

Nothing Like Work Says The Million Pounder.

The last thing John D. Dwyer, of London, England, who became a millionaire when the contents of his uncle's will, Lord Dwyer, were announced, would think of doing is to retire from business.

"The you stop work you might as well be dead," he said, when notified he had been left a million pounds, free of legacy duty, by his uncle, the famous Lord Dwyer, and sportsman. "It is work that makes life worth living."

Dwyer, who is 35 years old, added that he was old enough not to be excited about a million pounds, and said he hoped to carry on his uncle's racing stable.

Refused the Bargain

Hotel Proprietor Not Anxious To Buy Dean's Shoes.

A hotel man walked into a popular Broadway shoe store last night to buy a pair of shoes.

"I've got five pairs here you can look over and if you like them you can have them at a big discount. They were ordered by a fellow who died a few days ago, and they're 'they're good to him now,' said the clerk.

The clerk showed the shoes. They were a great bargain at the price. But the hotel man shook his head.

"No, I think I'll give you a pair," he said. "I never have had a desire to walk in dead men's shoes," and he bought a pair that were no alive they squeaked.

Profitable Visitors

American visitors in Great Britain are estimated to spend as much as \$15,000,000 in that country every year. That amount does not include any clothes, etc., they buy to take home again; it is what they pay for entertainment and service while visiting.

It is difficult to understand why they call it income tax when it means that everything is going out.

The giant frog of Africa, the largest species in the world, sometimes weighs more than ten pounds.

"Do you draw teeth without pain?" "Certainly. At first I was affected a little, but now I don't mind a bit," -Galleries, Madrid.

W. N. U. 1842

Old Tea Package Press Found

Device Used By Late Hon. Peter Larkin Forty Years Ago

The first press invented and used by the late Hon. Peter C. Larkin, forty years ago, in putting tea in paper packages, was located in the grocery store of Hugh Cooke, Kingston, Ont., recently. Mr. Larkin, until his recent death, was Canada's High Commissioner in London, Eng., and for years called America's "tea king" was the first to sell tea in packages. For the purpose he invented a patented press and did the work by hand.

Kingston was one of Mr. Larkin's favorite places when he toured the province as a travelling salesman for tea, and one of his friends there was the late James H. Henderson, who, with his brother, kept the Italian Warehouse, a local store which dealt only in the choicest of groceries.

Mr. Larkin wanted Mr. Henderson to go into partnership with him in the tea business. However, when Mr. Henderson remembered his old Kingston friend by sending him as a souvenir of their days together the press, he must need in making tea up into packages.

This apparatus came into possession of Mr. Cooke who succeeded Mr. Larkin as tea proprietor of the old established house upon his death. Mr. Larkin had great faith in his tea business, and he prophesied that it would yield him a fortune some day, which prophecy was fulfilled.

Deserves Consideration

Canadian People Should Prove They Are Not Grumblers

A Canadian writer from the United States points out a point of difference between the two peoples. He says that Canadians have a habit of putting the worst face on things; the Americans make the best of every situation. He never hears Americans running down their community or their country. All their difficulties in his community is the finest place in the land; if there are hard times little is said about them. On the other hand Canadians seem to take a delight in grumbling about how bad everything looks.

Canadians may be well advised to keep away from a false optimism; but at the same time it may be altogether too true that they are grumblers.

Perhaps we could take a lesson from the people of the South. Their unflinching optimism and confidence in their country sets a fine example to the growing generation; the young American is both to believe that he can get anywhere in the world and better his lot. It is quite probable that young Canadians, listening to the grumblings of their elders, get the impression that Canada is not a first class country and have an ink to go to sleep.

This is a matter that deserves serious consideration and is worth discussion by the public. -Regina Morning Leader-Post.

Definition Was Accurate

A complaint of digestive troubles was told by a specialist that he was drinking too much and would have to knock it off.

"Well," said the patient, "what am I to tell my wife?"

The doctor thought for a few minutes and then said, "Tell her you are suffering from syncope. That will satisfy her."

The patient, who as he was told, "What is syncope?" asked his wife.

"I don't know," said the husband, "but that is what he said."

When her husband had gone out the wife looked up the word in the dictionary and found it means "irregular movement from hair to hair."

Churches and Publicity

Whether newspaper publicity is valuable or embarrassing to church conferences was a subject briefly debated by the Toronto Presbytery. It depends a great deal upon what subjects are being discussed, but there can be little question that, on the whole, publicity should be a good thing for church activities in general.

On the other hand, publicity should be of the kind which publicity cannot fail to help.

Opium Given To Children

Opium is only smoked in a few districts in India, but raw opium is given in most parts of the country, and over a great part of Central and Western India it is administered to babies to keep them quiet. This practice has increased alarmingly in certain industrial areas, notably the Bombay cotton mills where children are given three or four years of age are regularly "doped" while their mothers work.

Older Men Are Needed

Business and Industry Depend On Their Leadership Says Henry Ford

Henry Ford believes "more than ever" that business and industry must depend upon the leadership of men in mature years. He stated that he had found no occasion to change his previously expressed opinion that if all the men of 35 years and older were removed from industry "there would not be brains enough left to carry on."

"There is no selection upon the youth of today," he said. "I think that while they are diffident, they are young and are a fine lot and they decidedly are not headed for perdition. Moreover, they have greater opportunities today than the youth of 40 and 50 years ago."

Mr. Ford was asked whether he always had conceded the wisdom of age.

"You didn't think that back in 1894 when you began tinkering with your horseless carriage, did you?"

"I always had older men for friends and I always went to them for advice. I consider them my superiors. Older men understood my idea better than young men. With mature years I realize the value and more the value of that advice. I realized that in my youth I had wasted up yet," he replied.

Youth and age need each other. Mr. Ford went on. "Youth must look to age for its education," he said, "and age education youth because youth interests it."

Problems To Be Solved

The Ones Connected With Airplanes Are Just Beginning

Society has not yet grappled successfully with the human life and health problems raised by the automobile. It should be able to do so to protect life and property from falling airplanes or objects falling out of airplanes, and it might first of all do what is easiest, insist that airplane motors be muffled and kept muffled at whatever height or wherever region. All these difficult problems will have to be solved, but by far the easiest time to do it is the beginning. The airplane is still in its infancy. The death rate caused by the automobile is a warning what the airplane may do in the way of destruction and disturbance unless the necessary remedies are applied.

An Effective Silencer

At a dinner one of the speakers was exceptionally long-winded. At the end of half an hour the inebriated chairman could stand the flow no longer. He clanged his belt violently and the orator was so surprised that he sat down without completing his last sentence.

A guest sitting next to the chairman whispered with a sigh, "I wish I had a belt like that at home."

Flappers of Australia have taken up the beautiful idea.

A new attachment to a washing machine makes ice cream.

KILLED IN PARACHUTE JUMP

Arctic Scout G. P. Mackenzie

For both monetary and sentimental reasons Canada should continue to take an interest in her Arctic possessions. George P. Mackenzie, officer in charge of the Arctic expeditions of the North-West Territories branch, said, addressing an Ottawa service club.

Everywhere he went he was faced with the question "Is all this trouble in the Arctic worth while?"

In the first place it was dangerous to state that any land area did not possess value, Mr. Mackenzie continued. Great quantities of furs were already obtained there when the United States purchased Alaska for seven million dollars many criticized the scheme. The animal exports from there now were valued at 14 times the purchase price. What might lie beneath the soil of these Arctic lands nobody yet knows.

Mr. Mackenzie believed that there were strong sentimental attachments to the Arctic possessions. The Eskimos were worth while. In fact were a wonderful people and the happiest he had ever met. "It would be a sad commentary on our so-called civilization if they were left to shift for themselves," he added.

Fen Will Be Preserved

The historic pen with which Premier Anderson, of Saskatchewan, signed the Natural Resources agreement, has now been silver mounted with a suitable inscription and will rest among the archives of the province. The inscription reads, "Pen used to sign the Natural Resources agreement, March 24, 1930." Incidentally this pen bears the inscription "Made in Great Britain."

Information For Visitors

Some 25,000 maps of Alberta have been sent to the office of the Calgary Board of Trade for distribution by the Alberta Development Board, southern section, to points throughout Canada and the United States. The booklet is full of typical information of the north visited by visitors.

Princess Vert's Empress

The "Empress of Britain," mammoth new Canadian Pacific liner, appears to be much in Royal favour, for not only will she have the distinction of being the first of her class, but she will also have the honour of being inspected by Princess Mary, who paid a surprise visit to the hospital about last night, which incidentally will be the largest vessel to be launched in Great Britain since the year 1914.

The Princess, shown above in the uniform she wears as Chief of the Girl Guides, made the 100-foot ascent to the decks in the workmen's electric lift in order to inspect the vessel, and was loudly cheered by the workmen. After the visit to the steel hull, which has already been painted white, with a band of royal blue, Princess Mary inspected typical cabins and was delighted with the luxurious equipment and the use of Canadian woods for paneling and decoration. The ship's color design was first used when the "Medusa" was thus painted to convey King George and Queen Mary to the great Durbar in India in 1911.

The Value of Libraries

Books Are Of No Benefit To People Who Do Not Use Them

Premier Ramsey MacDonald, speaking the other day at Manchester, had something to say about the value of libraries. That is worth noting. You can be observed, on much and possible nothing. Many a pauper with the indubitable quality of taste is far richer than the people who own the greatest amount of things. Mr. MacDonald's belief is that money has never yet been wasted on libraries and that investment in books is a capital investment, the capital of which never undergoes wastage or deterioration.

But he warns against the mere establishment of a library and then neglect of its use. "A library not used with appreciation and taste," he says, "is a colossal waste, and books merely arranged in rows on shelves are like the coffins of distinguished families placed in their shells in view of neglect."

The comparison is a pungent one, but it is not unjust. How many instances, impressed with the idea that it is the thing to possess a library, just give a wholesome order for books—sets of them, rows of them, having set them up in libraries, leave them virtually untouched for years? How can any such neglect be the slightest benefit to the owner of such a library?

Most men with a solitary shelf of well chosen books which he can read and re-read, and which are well-thumbed, is potentially far wealthier in spiritual goods than the man who possesses thousands of volumes and never takes a look inside them. A man should put as much care and thought into the selection of his reading as he does into the decisions that govern his daily business. There is nothing that will pay him more satisfying dividends in life.

The Age Limit

Something Wrong When Man Is Old At Forty-Six

How old is "too old?" Sociologists are growing worried because of the industrial revolution which is replacing middle-aged workers with young men. A man of fifty very often has a hard time finding a new job. In many quarters, evidently, a man is believed to be close to senility when he passes forty-five.

Most startling of all is the refusal of Captain John K. Davis to navigate the exploration ship "Discovery" on a voyage to the Antarctic. When the command was offered him, Captain Davis declined, saying that a younger man should be chosen. Yet Captain Davis is only forty-six!

That is putting the age limit pretty low. If a man of forty-six is too old for an important job, the premium on youth must be even higher than we had supposed.

Bahia, a Brazilian city built on two levels, now has two large high-speed American elevators to transport "commuters" from one level of town to the other.

Canada Sets The Pace

In Some Cases Dominion Is Outdistancing Other Nations

Impartial testimony to the progress Canada has made in recent years, which happens to be the period of the Mackenzie King administration, is given by S. H. Logan, general manager of the Canadian Bank of Commerce, in a comprehensive analysis of world business trends recently. Mr. Logan states that while the whole world has shown intense economic activity, bringing production to a new high level, the rate of increased production in Canada has exceeded that of the world by a wide margin in many important branches of economic activity.

The rapid growth in the productions of Canada since 1926 has given this young country of ten million people a place as a producer alongside of and in some cases ahead of the great nations of the world. Thus Canada is:

- First in the export of wheat.
- Second in automobile manufacturing.
- Second in hydro-electric generation.
- Third in the production of gold and silver.
- Third in the production of paper.
- Fourth in the production of copper and lead.
- Fifth in the production of rubber.

Sixth in the production of zinc.

The Dominion does not rank very high as a producer of oil, petroleum and steel, but even with respect to these items production has grown faster than that of the world and is about to make tremendous strides.

As Mr. Logan observes, Canada's progress to date only gives a hint of her potential power. The collapse of stock market speculation on this continent leaves the physical structure of the world on a broader foundation than ever.—The Toronto Star.

Thought Everyone Was Satisfied

New York Architect Has Idea For Mixing Letters Mattered

The days are past when architects can go astray in the Arctic, as the Rt. Rev. I. O. Stringer, Bishop of the Yukon, addressing the Women's Press Club, Toronto, on the north as it was 38 years ago, and as it is today. He told the story of Indian run-ins arriving with the mail which had fallen through the ice into the water and which they had dried around a campfire, and how he put the letters back in the right envelopes. Mrs. Stringer had received a letter addressed "to Jack" from a girl who hoped that he would be back soon to marry her. When the Indians were blamed for mixing up the mail, they replied: "Didn't everybody get one?" But some, said the Bishop, did not feel like claiming the love-letters intended for them.

Needed Some Himself

A stool, old lady of 200 pounds was struggling valiantly up the steps of the street car.

"Stop lively, Ma," urged the conductor with more familiarity than she liked. "If they'd given you more yeast when you was a girl you'd be able to rise better."

"Yes, young man," she retorted, "and if they'd given you a little more yeast you'd be better bred."

Site Of Grain Exhibition

According to a booklet dealing with Regina as the site of the forthcoming World's Grain Exhibition, it is pointed out that the city is the centre of the hard wheat area and that within a radius of 100 miles are found half the population of the province. The Regina area that that market is \$2,864,000,000 and the same buying power \$332,000,625. The city's population is about 40,000.

Harry—Do You Ever Buy Candy For Your Girl?

Harry—"Why should I? She's always got some around the house."

"Why are you crying?" "I'm not a halfpenny."

"Here's another one. Why are you still crying?"

"Here's one I didn't say a thing to."

Hummel, Hamburg.

The "Empress of Britain," mammoth new Canadian Pacific liner, appears to be much in Royal favour, for not only will she have the distinction of being the first of her class, but she will also have the honour of being inspected by Princess Mary, who paid a surprise visit to the hospital about last night, which incidentally will be the largest vessel to be launched in Great Britain since the year 1914.

Dr. Cassell's Food and Health Tonic

What most people call indigestion is actually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude bakes. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One teaspoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Learn now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting acid causes. Each bottle contains full directions—each drugstore.

WORLD HAPPENINGS BRIEFLY TOLD

Sir John Simon, head of the recent British commission to India, plans to return to India, August 3, aboard the "Duchess of Athol."

French troops of Calais, Boulogne, Havre, Dieppe and Cherbourg are reported well satisfied that the British Government has decided against a tunnel under the English Channel.

Carol Caraiman, citizen, has become King Carol II. of Rumania, by a vote of the Rumanian parliament, which lacked only one of being unanimous.

Andrea Macedo, a Portuguese, called from Morocco, June 9, for New York, in a 26-foot sloop named the "Aurita." He was the lone passenger, sailor and navigator.

Any Johnson, whose lone flight to Australia has roused the British, has been given \$50,000 by Lord Rothermere's Daily Mail, in recognition of her performance.

Two hundred members of the Argentine Producers' Union, of the B.R.C., on September 14, to commence a tour of Canada.

Passenger train on the Continent are fast being equipped with radio receivers for passengers. The latest is the train from Havre to Paris. Passengers can hear the latest news and listen to Eiffel Tower Radio, Paris, or radio station SOXX.

The Prince of Wales and Prince George have both entered planes in the King's cup air race to be held July 5. Squadron Leader Don, who has been the Prince of Wales' pilot on recent flights, is expected to fly the royal heir's train.

For the first time an airplane will be used for inspection of Indian agencies and reserves in the Mackenzie River district. Inspector C. C. Parker, of the Department of Indian Affairs will leave Waterways, Alberta, early in July, his most northerly objective being Herschel Island.

Western Canada Now Mecca

Request For Information Received From United States Motorists

Motorists in many parts of the United States, having exhausted the possibilities of travel in Eastern United States, are now looking to Western Canada as their new Mecca. This was the frank statement in a letter received by the local office of the Saskatchewan Motor Club from St. Louis, Missouri, the Automobile Club of Egypt, which urgently requested a generous supply of road maps, booklet, holiday and road information concerning Saskatchewan.

A Century Old Song

That fine old song "Rocked in the Cradle Of The Deep"—a perpetual challenge to bachelors—written by Emma Willard, nearly one hundred years ago. Emma, an American poet of note in her day, died on July 14, 1881, after a violent storm had struck during a voyage she had made aboard the great ship "Bally," says Thomas F. Madigan in "Word Shadows Of The Great." So that she was one person at least who went to sea before writing about it.

In the first three months of this year 10 British army aviators were killed in five crashes.

Florida has a longer coast line than any other state in the Union.

Rheumatism Cure

After years of hesitating, you will find this is the only cure for rheumatism. It is a simple, reliable, and safe remedy. It is a cure for all types of rheumatism, whether it be acute or chronic, whether it be in the joints or in the muscles. It is a cure for all types of rheumatism, whether it be in the joints or in the muscles. It is a cure for all types of rheumatism, whether it be in the joints or in the muscles.

W. N. U. 1842

have held their own with the best that could be produced anywhere. It is a matter of gratification to the people of Manitoba that, for a citizen, his Honor the Lieutenant-Governor, James Duncanson McGregor, has risen to his eminent position in the community largely through his success as a breeder of pure-bred cattle. That success has been due to his intelligence, persistence, hard work and a refusal to believe that "it couldn't be done."

The story is the same in regard to other phases of farm activity. Who is there among the middle-aged people of Manitoba who does not remember the day when butter from Eastern Canada was considered essential to human existence here? A quarter of a century ago it was almost impious to suggest that this Province should manufacture its own butter. Today the Manitoba producer is known and appreciated all over Canada, and in many foreign markets as well. During the past ten years it has won most of the cups and prizes at leading exhibitions in every part of the Dominion, and has set a standard in the manufacture of butter which is a model for creamerymen in all other provinces.

For eggs, the leading authority in the Dominion is on record with the statement that for excellent flavor and food value the product of the Manitoba hen is invaluable. Honey represents another industry where local achievement in the past few years has crowded out the foreign article. The honey housewife who buys a pair of jars of Manitoba honey is getting the best that is to be had. The refusal to lie down or retreat in the face of serious problems has always been characteristic of Manitoba pioneers, and luckily that spirit persists in most of their descendants. The result is that enthusiasm, perseverance and idealism, coupled with a lavish expenditure of muscular energy and perspiration, has gone far towards giving Manitoba a proud place in Canada and in the Empire. Incidentally the province of Manitoba has the advantage of being the best that is in it worth while—Old Timer.

No Longer a Mystery

New Zealand Trade Commissioner Knows Why Canada Imports So Many Cattle

"Until I went to Canada in 1926, I could never understand why the Canadian people so much money in importing sausage casings from New Zealand—about \$70,000 a year," he now says, says W. Collins, New Zealand Trade Commissioner to Canada, at the Auckland Chamber of Commerce luncheon.

"I found the explanation when I landed at Vancouver, and went to a 'football' match. I was met by a 'small boy, who solicited business in these words, 'Hello, Doug, 10 cents. Good for you!'"

"In my travels through Canada I soon came to realize the enormous production and sale of the so-called 'hot-dog' and I did all I possibly could to increase the production of that delectable food. When I am among the Canadians again, I am going to use my best efforts to induce them to put in a lot of butter with the brand name 'Hot-dog' which always accompanies the 'hot-dog.' If they do, it will mean at least an other 10,000 tons of meat of sausage casings from New Zealand."—Morning Herald, Auckland.

Protection For Air Pilots

Royal Air Force Is Introducing Fireproof Clothes and Wings

Fireproof clothes for airmen and fireproof wings for their machines are to be introduced in the Royal Air Force. It is expected that as a result the tragic toll of deaths following airplane crashes will be reduced to a minimum.

A cheap and easily made fireproof solution has been discovered for treating clothes and other fabrics. It is a mixture of borax and boric acid, and is said to be so effective, that when a four-ounce cotton fabric was treated it could not be ignited by a naked flame.

The Fabrics Co-ordinating Research Committee has already approved the solution's use.

Paul Travelling George McDougall, a member of the Regina Flying Club, left for Winnipeg one afternoon recently, with W. G. Goss in a Moth plane arriving in Winnipeg at 7 o'clock. Half an hour later he climbed aboard the mail plane for Regina arriving at 10 o'clock. He had made the round trip in eight hours.

"You're a dear, sweet girl," sighed the dependent youth. "God bless me, I keep you I wish I could afford to."

One shipyard in Glasgow, Scotland, now is employing 1,000 men.

Cutworm Outbreaks, 1930

Are Present In Exceptional Numbers and Over Wide Areas

(Kenneth M. King)

The cutworm outbreak which was predicted for this spring is materializing in very serious proportions and over wide areas. Two types of cutworms are involved.—The Red-backed cutworm group generally throughout the park belt, and the pale western cutworm in a few districts as detailed below. It is important to distinguish between these two kinds, because of marked difference in means of control. These cutworms are present in exceptional numbers, and the early hatching and generally dry conditions of this season are conducive to a heavy rate of damage, although the coolness of the spring has been somewhat unfavourable to the cutworms.

Districts involved:—The Red-backed cutworm seems to be generally abundant this year in the bush country, throughout the park belt, and into the adjoining margin of prairie land. It is particularly destructive in gardens and in the broad corn crops, though cereals may also be seriously damaged.

The pale western cutworm occurs in two areas:—(1) It is extremely abundant this year in south central Saskatchewan, in the heavy red soils. The Red-backed cutworm definitely extends from Balcarres, Indian Head and Sinitabon on the east to Moose Mountain and on the west to the Central Belt on the west. Southwardly, it probably extends to the International boundary in which 4 or 5 inches have been destroyed in the same field in one spring. This year, reports are probably to be made at the end of June; this is, of course, too late for most crops, but barley may perhaps be used, or oats for winter feed or hay.

Where only parts of a crop are destroyed by this cutworm, the remainder may be partially protected by ploughing a deep furrow around each undamaged area.

Reports are also being given giving further information about one or both of these types of cutworm may be had upon request.

Large Entry From B.C. Canada has been on display at the Crystal Palace, London, England, during the fourth World's Population Exposition, July 22-30, a grand total of 863 birds, with 453 exhibition birds and 244 production birds.

The remainder will be made up of ducks, geese, and pigeons. A few specially good rabbits are also being sent forward. British Columbia's exhibit nearly half of the production breed birds.

A Nevada man has invented an automobile attachment that flashes a lamp on the instrument board of a car when a tire is punctured.

It is only at night that these cutworms come above the service to feed. (2) A warm night should be expected. The thermometer register less than 75 degrees Fahrenheit at sundown, it will be too cool to secure much of the cutworms. Best results are secured when the surface soil is moist. (3) The bait should be evenly spread over the surface, since the worms must come in contact with the bait in order to feed on it; a very thin application, 20 to 30 pounds per acre, in a few districts as detailed below.

The bait is prepared as follows:—Bran, 25 pounds; Parts Green, 1/2 pound of white arsenic, 1 quart of dish-cup molasses, 1 quart; water, 4 or 5 quarts.

The dry bran and poison are first thoroughly mixed together (keeping mouth and nose covered with a damp cloth, during the process). The molasses should be dissolved in the water, and this mixture then slowly stirred into the poisoned bran until it is thoroughly moistened and free from lumps. CAUTION—Keep any unused bait or poison out of the way of children or animals.

Pale Western Cutworm.—Poisoned bran bait has not proved effective against the pale western cutworm.

The special importance of distinguishing it from the Red-backed kind. In fact, there is very little difference between the two, but the Red-backed cutworm is much more heavily infested by the pale western cutworm, except to avoid waste of seed by delaying re-seeding until the cutworms have ceased feeding. These cutworms migrate very little, even when a field has been eaten bare, and are known in which 4 or 5 inches have been destroyed in the same field in one spring. This year, reports are probably to be made at the end of June; this is, of course, too late for most crops, but barley may perhaps be used, or oats for winter feed or hay.

Where only parts of a crop are destroyed by this cutworm, the remainder may be partially protected by ploughing a deep furrow around each undamaged area.

Reports are also being given giving further information about one or both of these types of cutworm may be had upon request.

It is a cure for all types of itching, whether it be in the joints or in the muscles. It is a cure for all types of itching, whether it be in the joints or in the muscles."

Shoes Of Habit

Men Would Rather Suffer Than Do Anything Unconventional

Why is it required in summer time that a gentleman wear his coat everywhere except on the golf links or tennis court, or in the swimming pool?

Dignity demands it, some say. Also, it has always been the mark of a gentleman to wear a coat, no matter how ridiculous he looks mopping his face and brow, or fanning himself violently with straw hat or newspaper.

Sports costumes have emancipated wits, so far as summer apparel is concerned. Short sleeves, no collars, light and airy materials, loose-fitting straight-line costumes, all help the female of the species, be the stapper or dignified matron, to look cool and comfortable in the eyes of the sweating man.

'Why do not the men declare a little independence in this matter?' Returning suspenders are to be worn beneath the shirt, so that dignity need not be sacrificed when the coat is removed. As an office uniform, the coat is still the staple make for greater comfort, increased efficiency and smoother tempers. Why discard the coat, or not, except for formality or comfort demand its use?

Although man never tires of basting the opposite sex for being the slave of fickle fashion, there are good reasons for suspecting that men folk would cast aside the coat for the sake of comfort if it were not unfaithful. Husband and wife the wives for being too conventional and mait under a heavy coat merely because it is unconventional to remove it in the presence of others.—The Port Arthur News-Chronicle.

A Quirer Coincidence

Three Commanders Of Trans-Pacific Liners Have "A. J." As Initials

Old sea-faring men say there must be a super-natural or something 'ac' of this 'A. J.' business among commanders of Canadian trans-Pacific liners. It is somewhat of a coincidence, superstition or not, that three skippers of the Canadian Pacific Ocean Services fleet were given the initials "A. J." when they were christened. It started with Captain A. J. Halley, veteran commander of the "Empress of Canada." And then along came Captain A. J. Hosken, of the "Empress of Russia." Now Captain Hosken is on shore leave and the man to replace him is another "A. J."—Captain A. J. Holland.

Andy—Money surely talks. Andy—But it never gives itself away.

Afrad of nothing in his prime the lion, king of beasts, becomes the prey of hyenas when old age comes.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute allows the full sunlight to enter, in light and flexible, easy to cut and fit. It withstands extreme changes in temperature, keeps out cold and wet, but glass.

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUBROOMS ETC.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Callies Defeat Town In Five Roses Cup

Both Teams Now a Tie For First Place.

One of the biggest surprises during this football season was pulled off last Tuesday when the Callies defeated the Town team 4 goals to 0 in the postponed Five Roses Cup series.

In casting about for a reason as to how the tall enders in the league should administer such an ignominious defeat to the top notchers, about all the Review could learn was that Redcliff put up one of its poorest exhibitions of the season while the Callies never played better.

The Callies appeared to have had much the best of the play all the way through. They scored one goal in the first half and three in the second half.

The result of this game places the Callies and Redcliff a tie for the Five Roses cup in the games played so far, both having won two games for a count of 4 points.

Mr. J. Devitt, who has been East with a car load of horses, returned to town Wednesday.

W. J. Fairbairn who has not been enjoying the best of health for some time suffered a bad attack last Monday but is now much improved.

THE UNEMPLOYMENT QUESTION IN POLITICS

(Continued from Page 1)

they make excuse, until a few rods of red tape have been run through magic unemployment cameras.

On the other hand we have the Hon. R. B. Bennett, leader of the Conservative party, who, having grasped the seriousness of the unemployment situation, has pledged his word that if called upon to form the next government of Canada, he will, if necessary, call a special session of parliament to solve this problem. Your vote for G. M. Blackstock on the 28th of this month will show that you appreciate the efforts of Mr. Bennett in this connection and that you do not approve of the dilly-dallying attitudes of the Liberal government.

The News also attempts to belittle the calling of a special session of parliament on the ground that the money necessary for such a session could be used for unemployment relief. Such buncum from the advocate of a political party whose leader has made such a laughing stock of himself of his party and of his position, by saying in effect, he would not give a five cent piece to any unemployed unless they happened to live in a province that had a Liberal government.

C. P. R. Traffic Appointments

Three important appointments in the freight traffic department of the Canadian Pacific Railway have been announced by George Stephen, newly appointed vice-president in charge of traffic. They are C. E. Jefferson, assistant freight traffic manager, western lines, Winnipeg, (centre of layout), who comes to Montreal as freight traffic manager; H. W. Gillis, assistant freight traffic manager, eastern lines, (right), who is appointed to western lines as assistant freight traffic manager; and Gerald Hiam, assistant general freight agent, Montreal, (left), who has been appointed assistant freight traffic manager, eastern lines. Mr. Jefferson entered Canadian Pacific service in 1913 as percentage clerk in the freight tariff bureau, Montreal, and in 1915 was promoted assistant general freight agent, Montreal. He became acting general freight agent in 1921 and general freight agent, western lines, in 1922, and in 1927 he was appointed assistant general freight agent at Montreal.

Mr. Hiam joined the Canadian Pacific Railway in 1904 and after holding several positions in the freight traffic department, vice-president's office and freight tariff bureau, Montreal, was appointed travelling freight agent, Toronto, and district freight agent, Fort William, in 1914. He went overseas to war in 1915 and in 1919 was appointed district freight agent at Cleveland, O. He went to Salt Lake City as district freight agent in 1920 and was appointed assistant general freight agent at Montreal in 1922.
